RESEARCH PROJECTS

- **Graph-based Multi-Document Summarization** Jan 2017 — Sep 2017
Advisor: Prof. Dragomir Radev Department of Computer Science, Yale University
 - Developed graph representation methods of document clusters. Proposed a neural multi-document summarization model that exploits the graph representations of documents. [CoNLL 2017]
- **Adversarial Learning for NLP** May 2017 — Present
Advisor: Prof. Dragomir Radev Department of Computer Science, Yale University
 - Proposed adversarial neural network training for natural language tasks such as sequence tagging and coreference resolution. Analysis shows the robustness of the proposed models to various inputs and languages. [NAACL 2018]
